

How many clocks are in this kitchen?

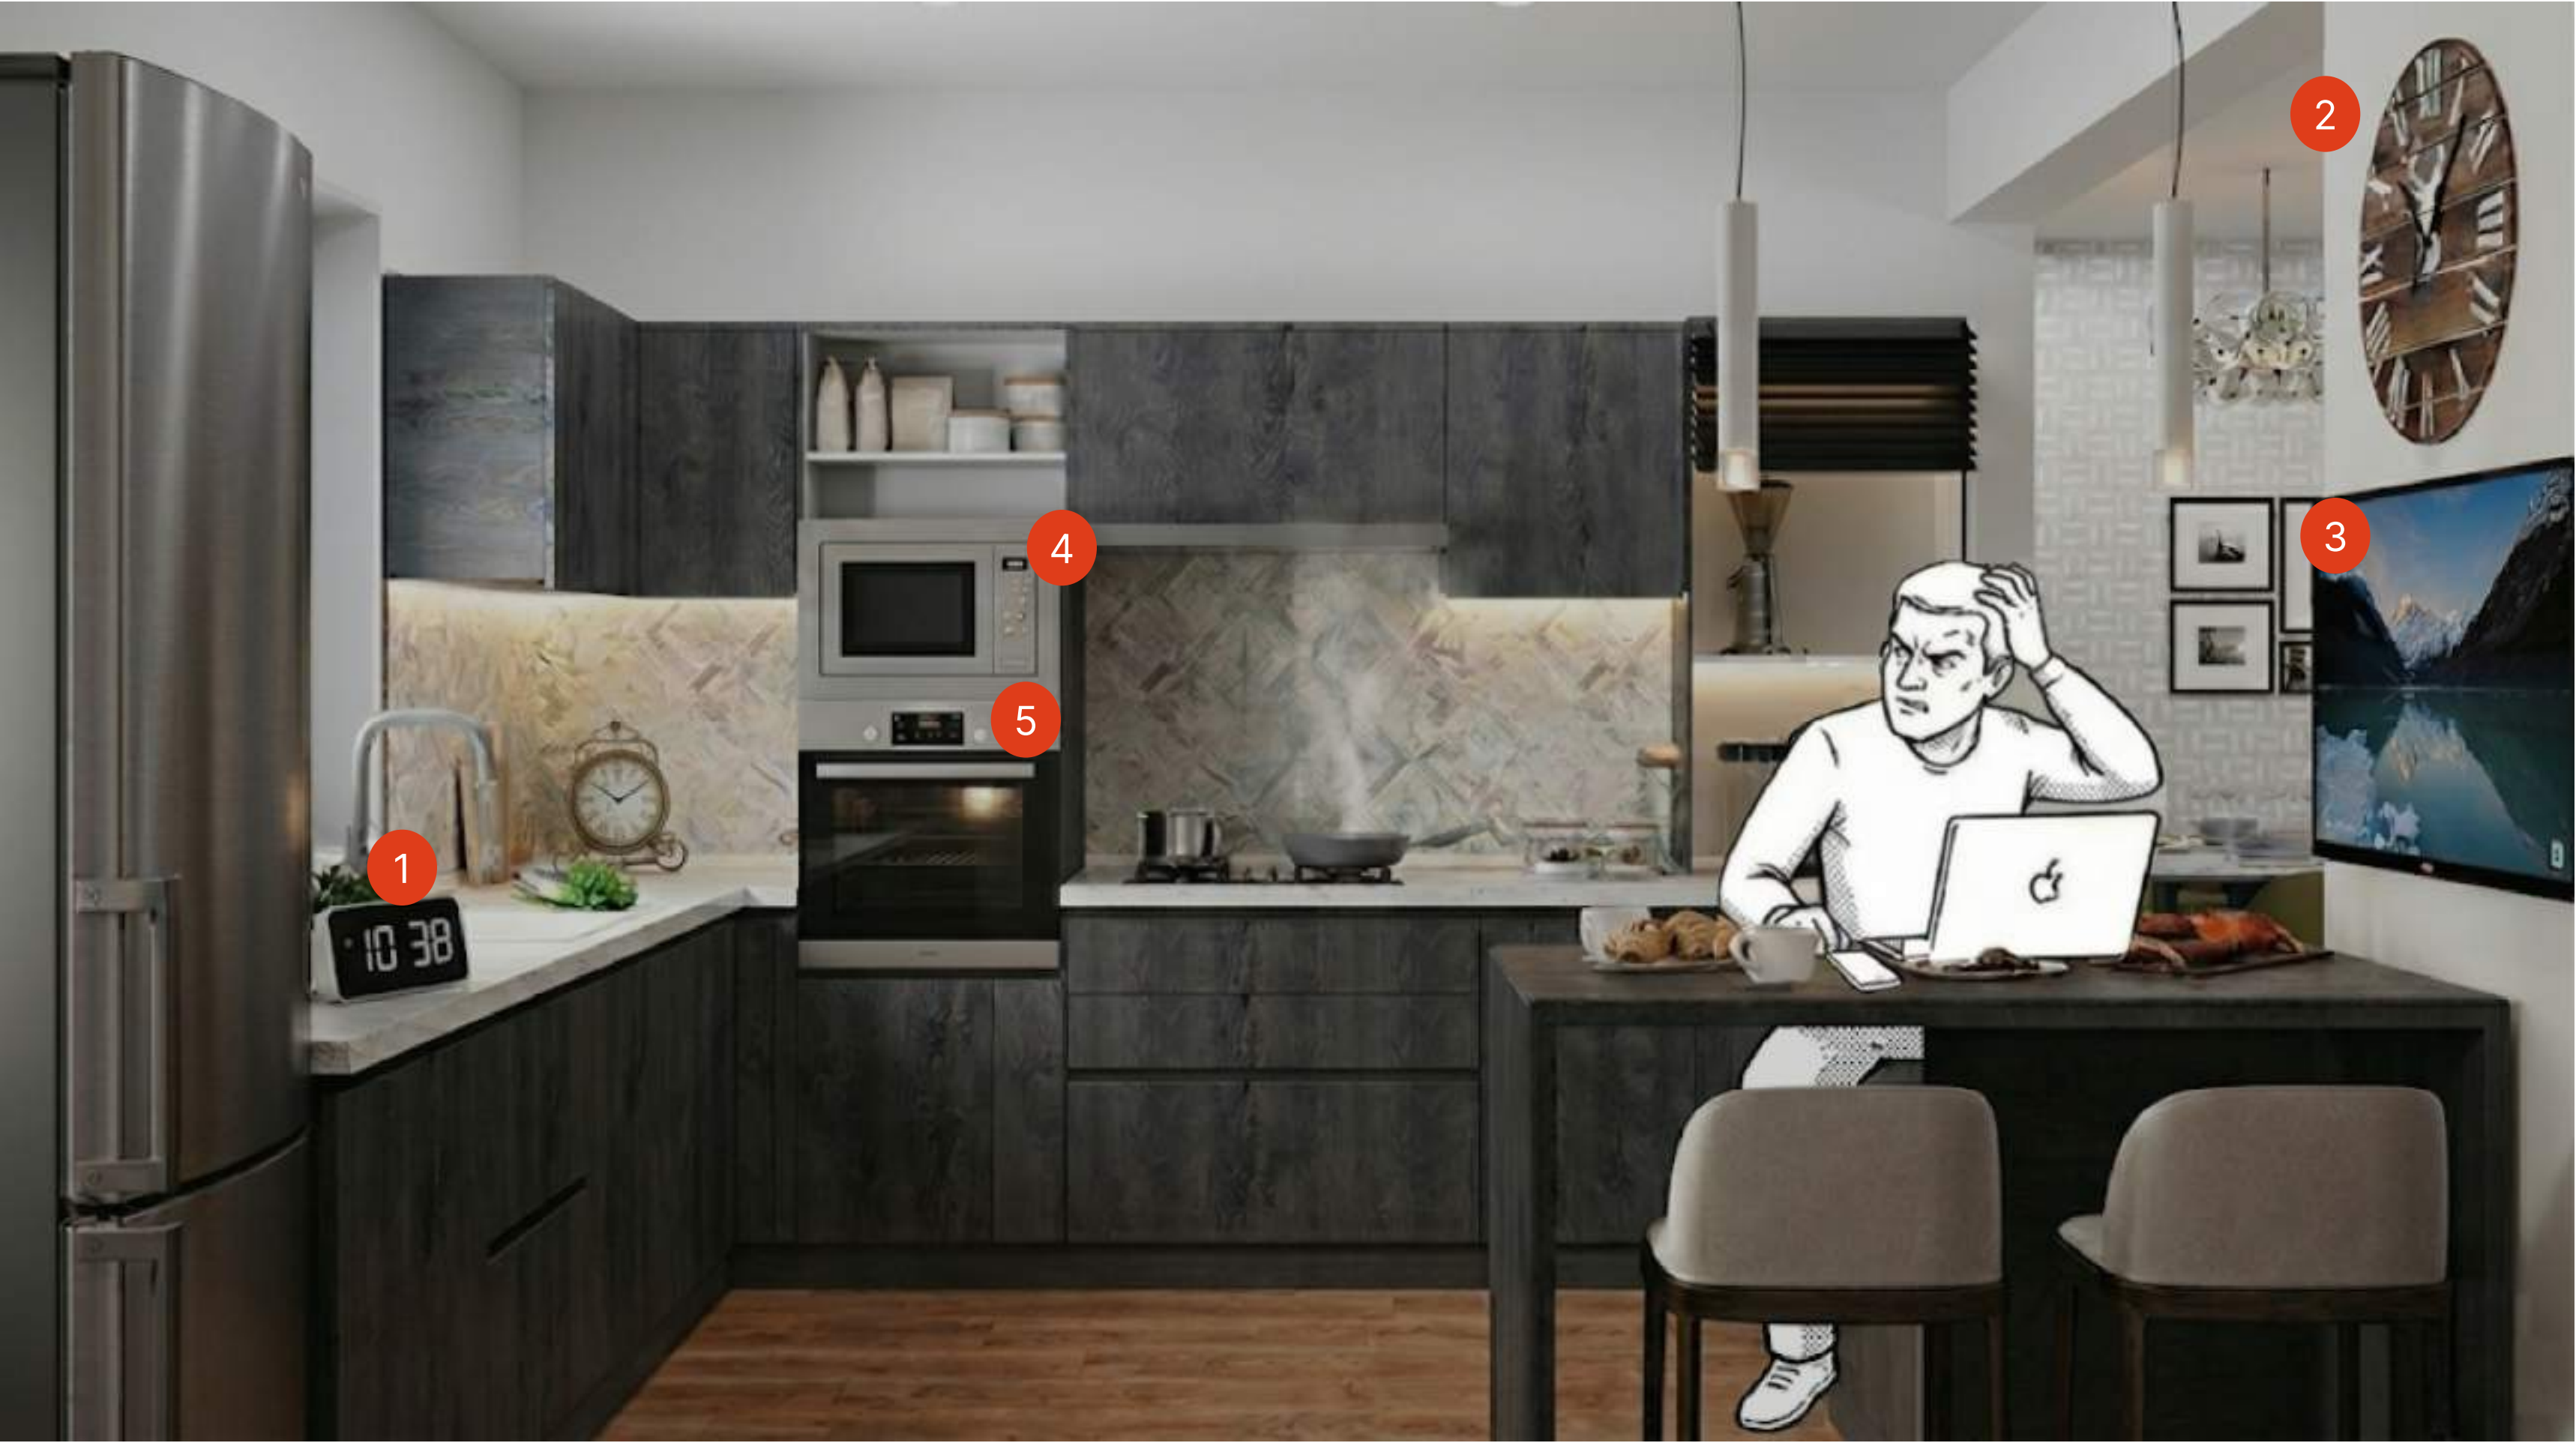

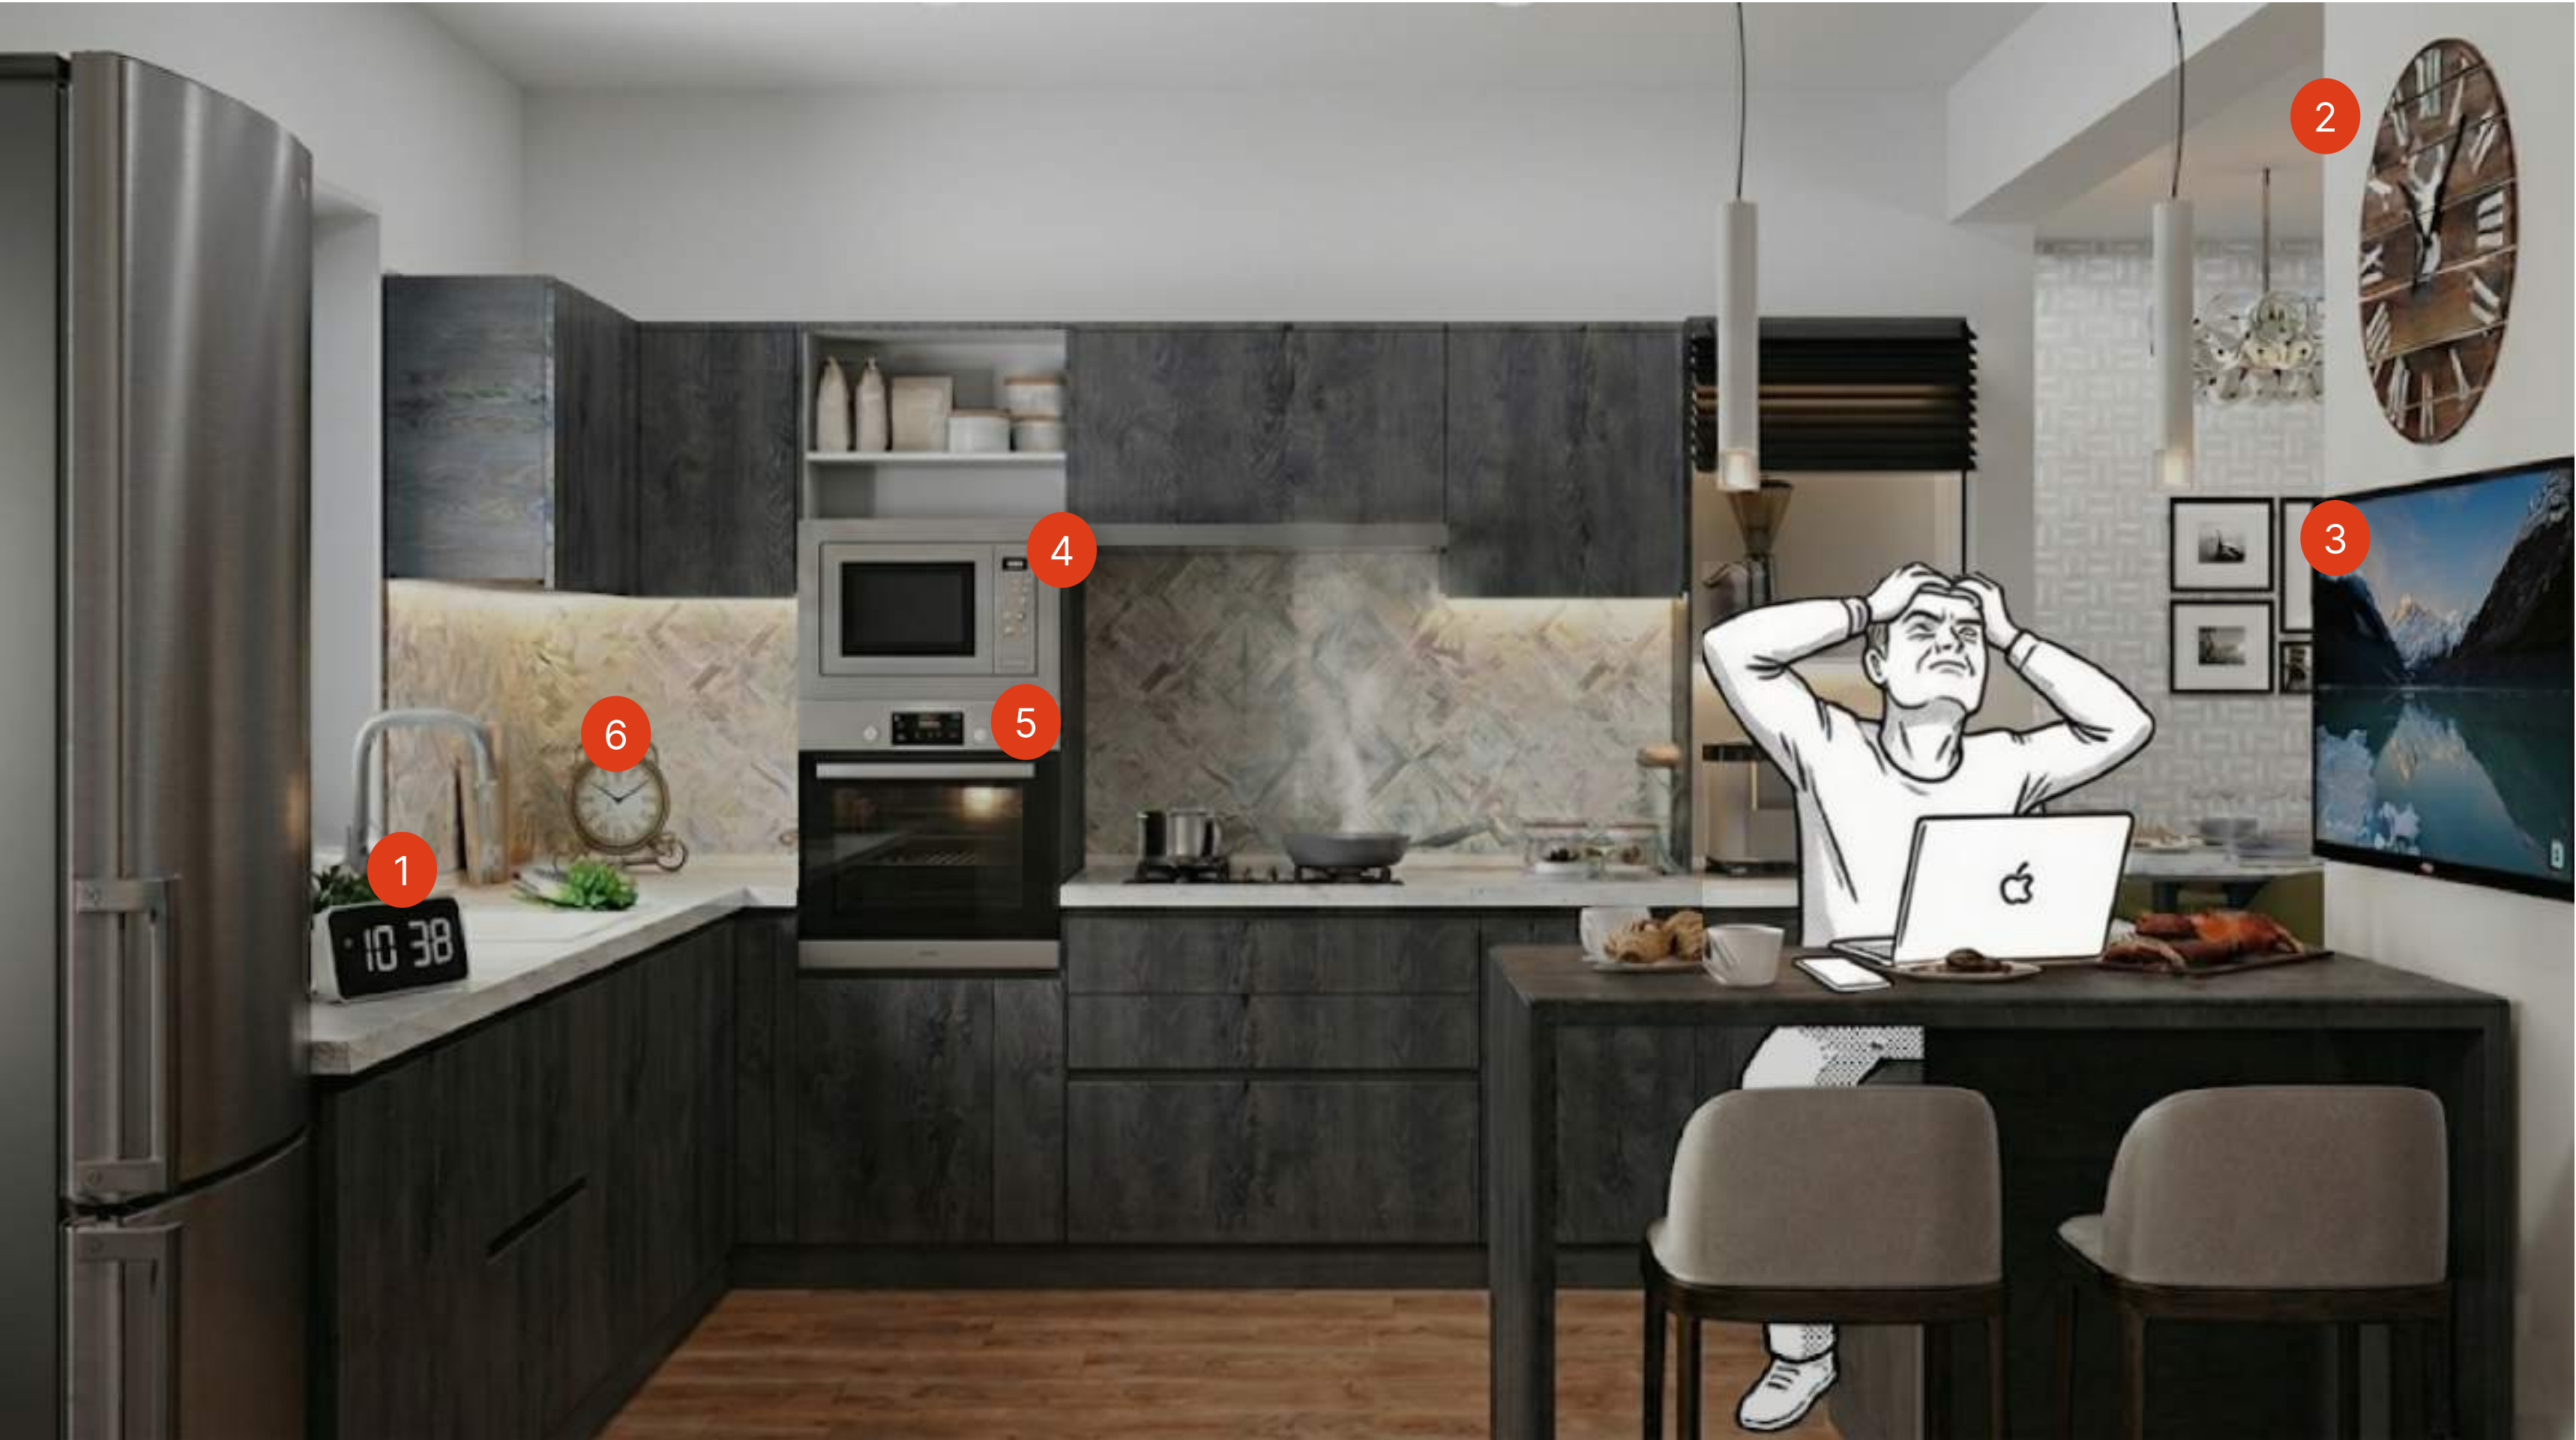

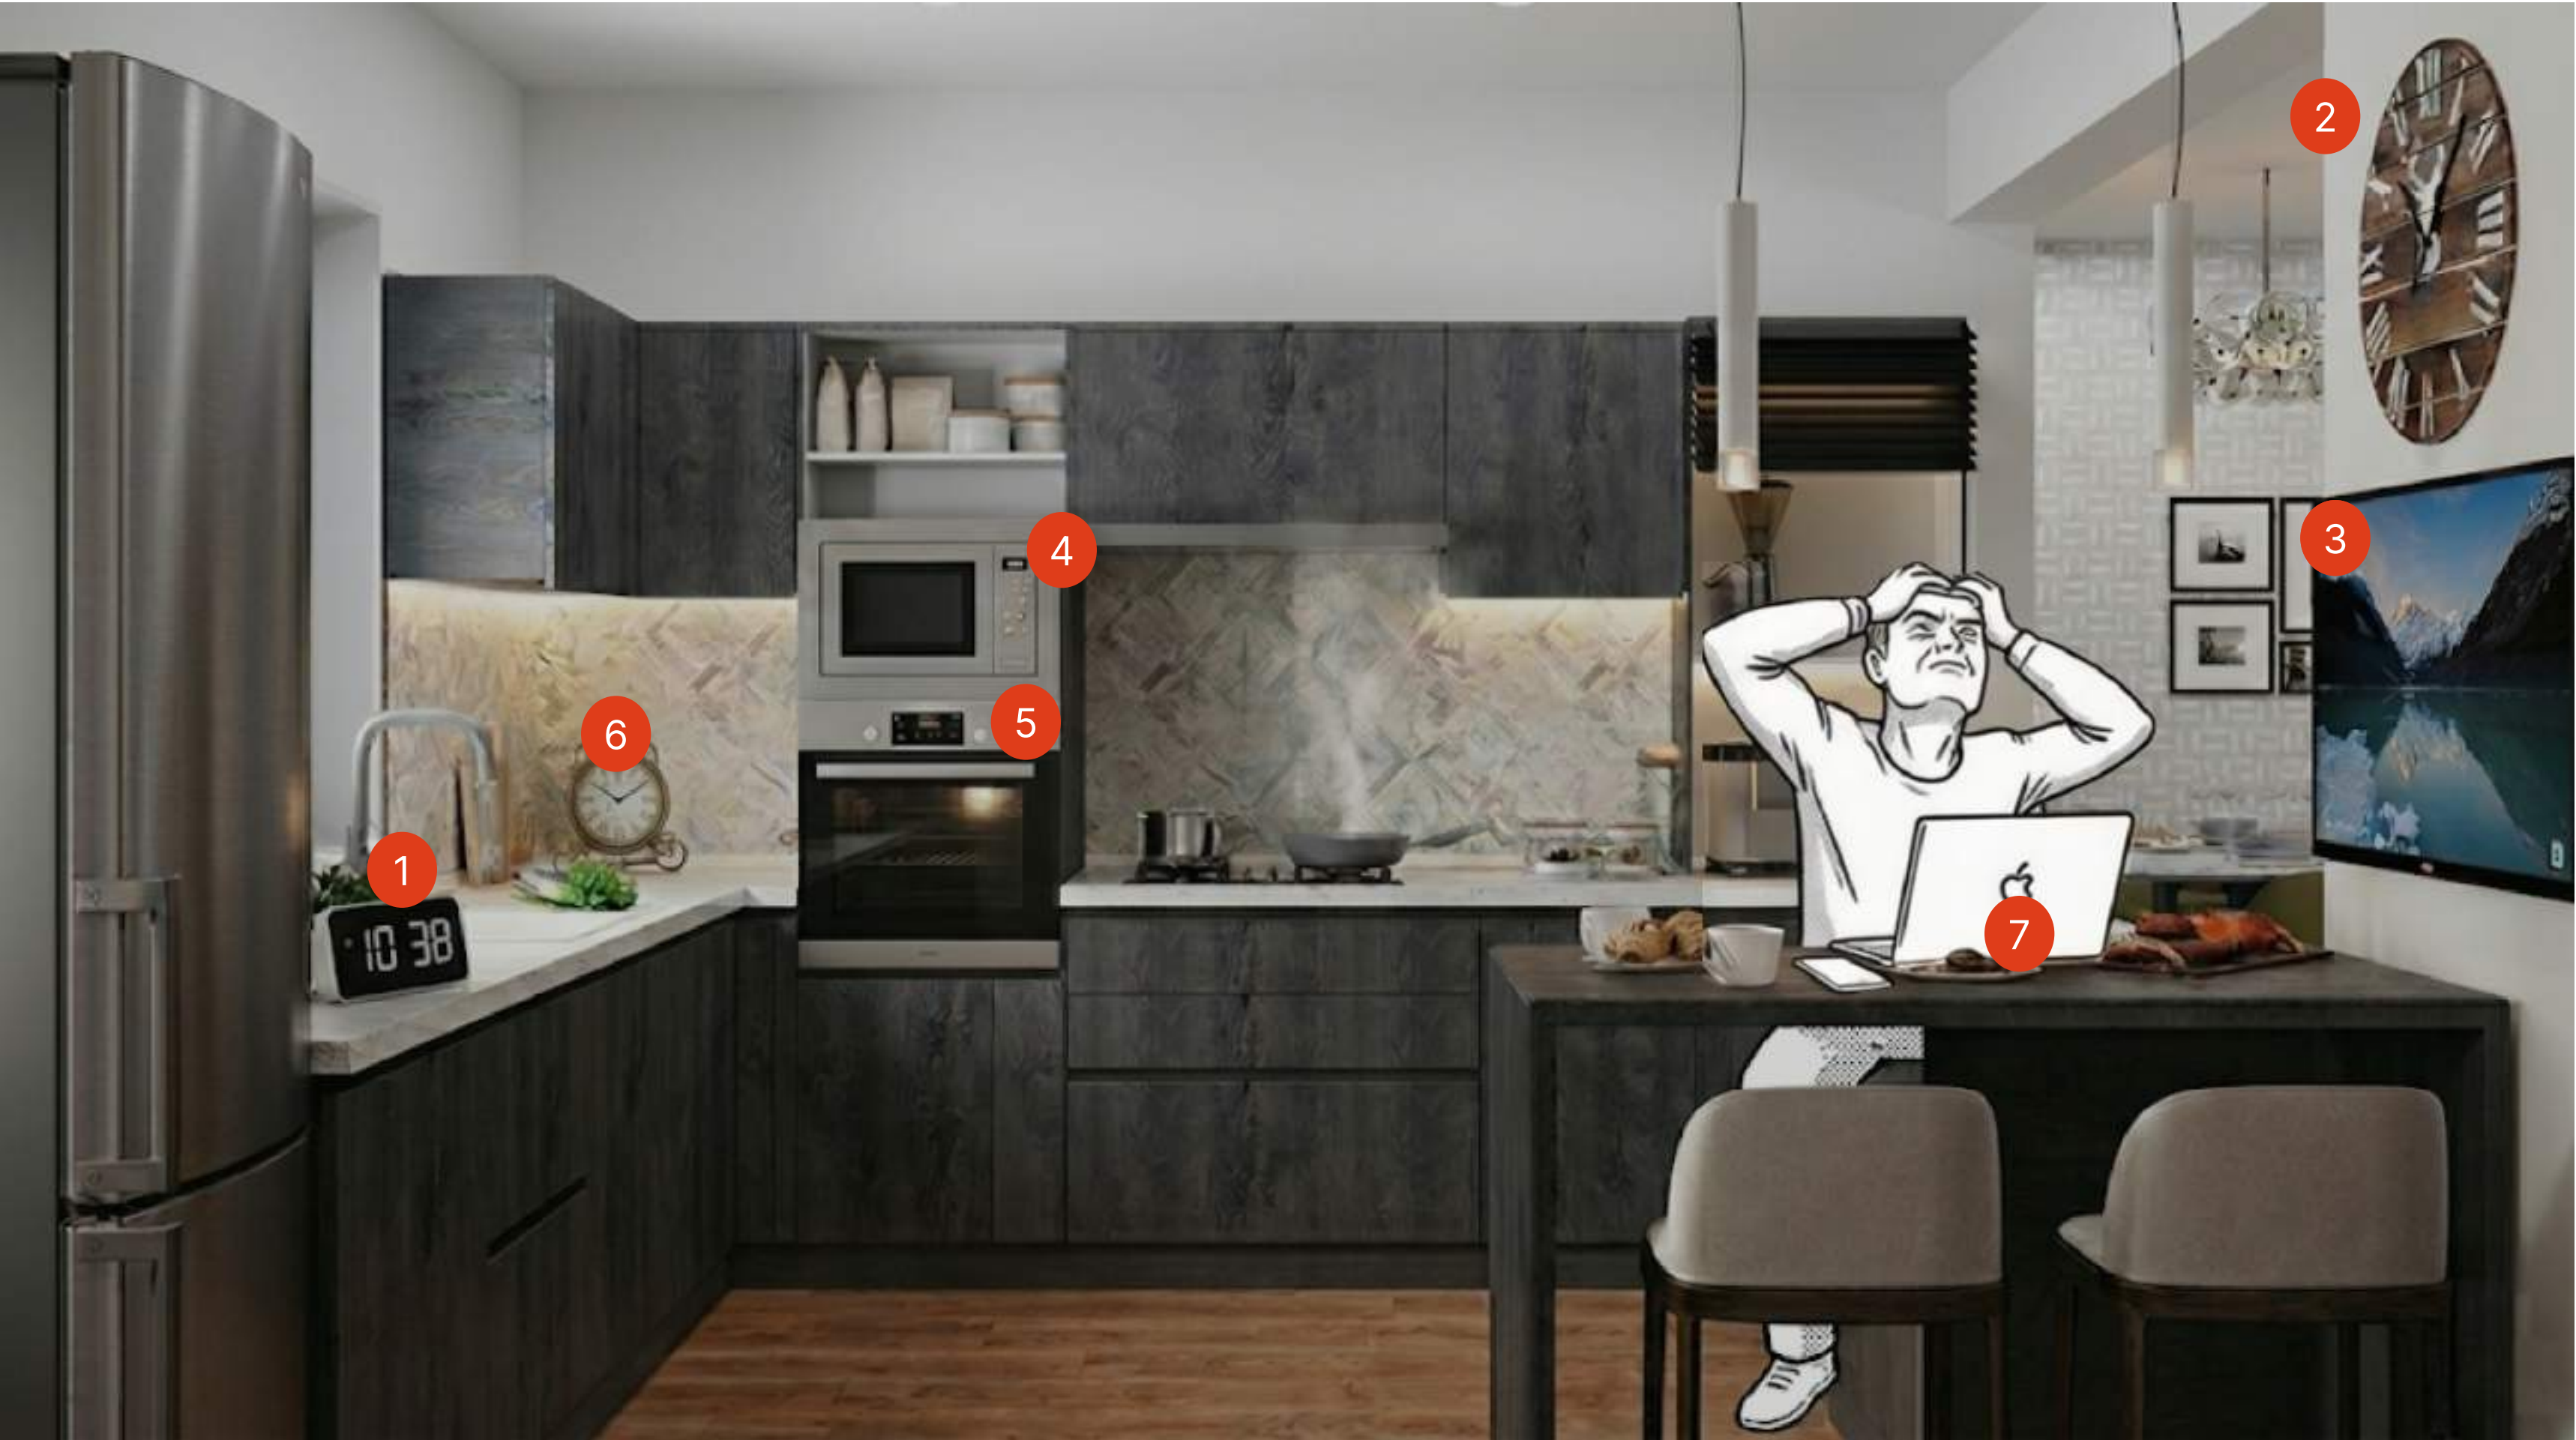

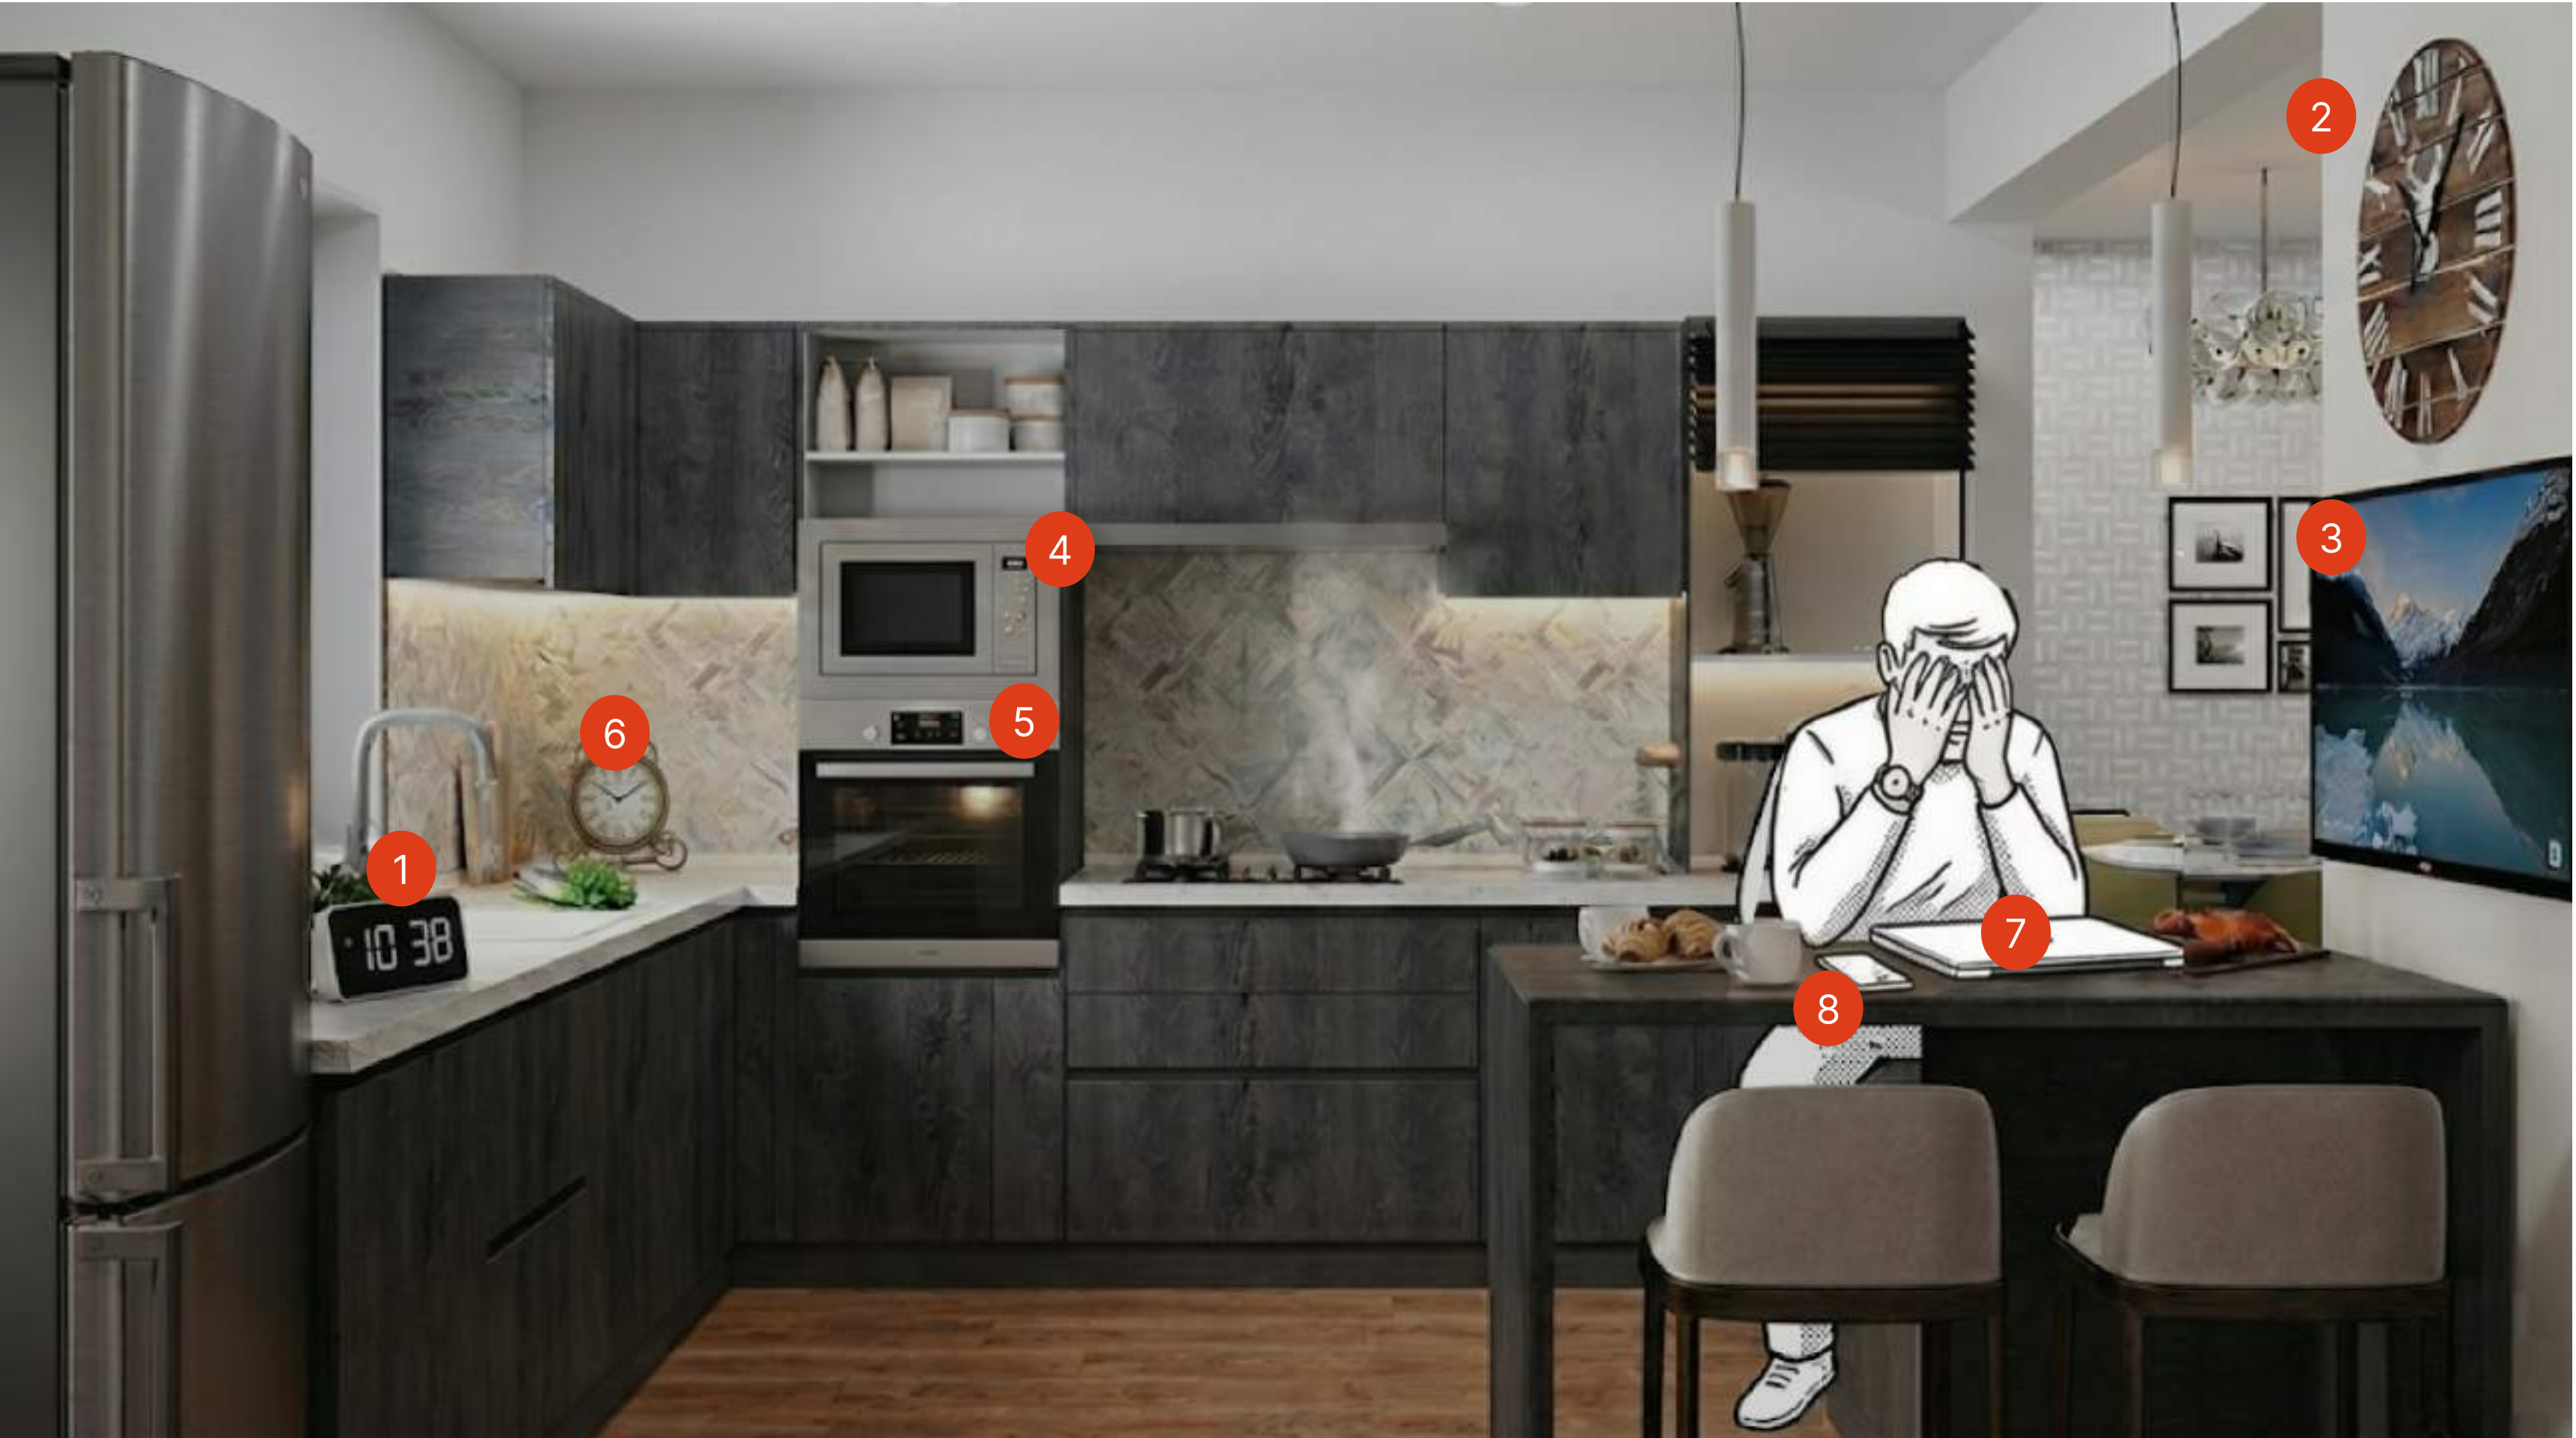

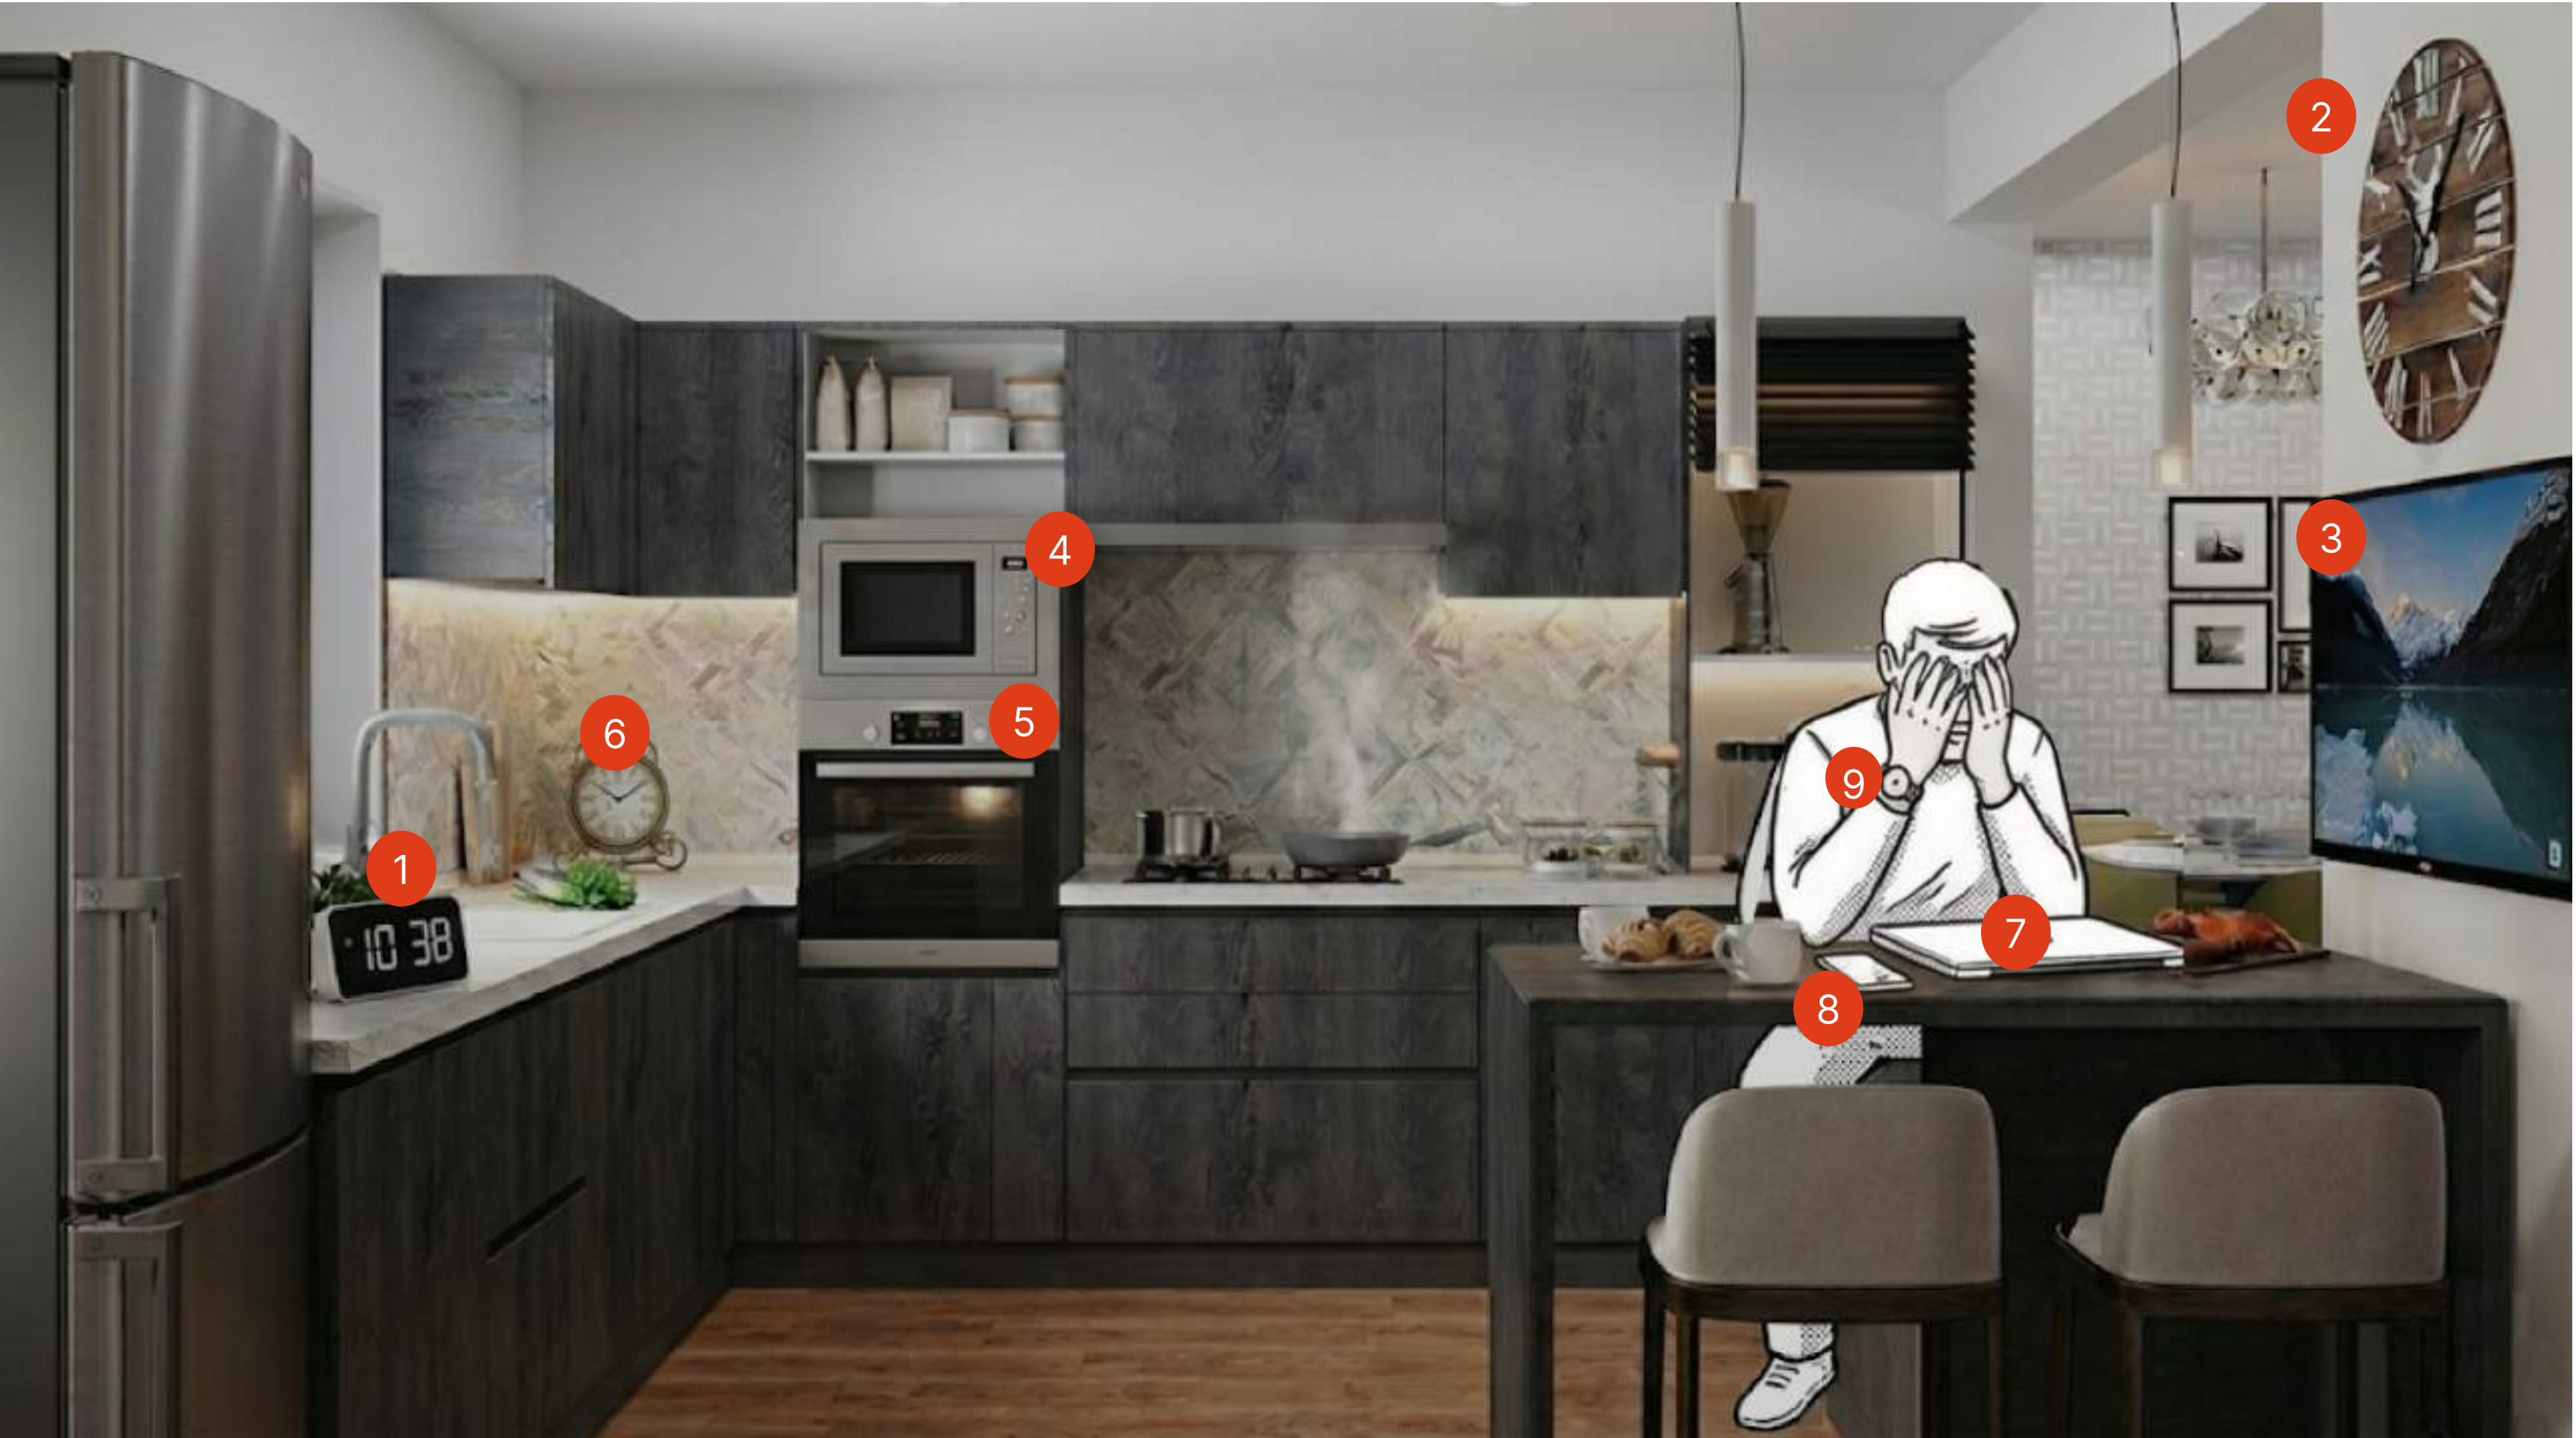

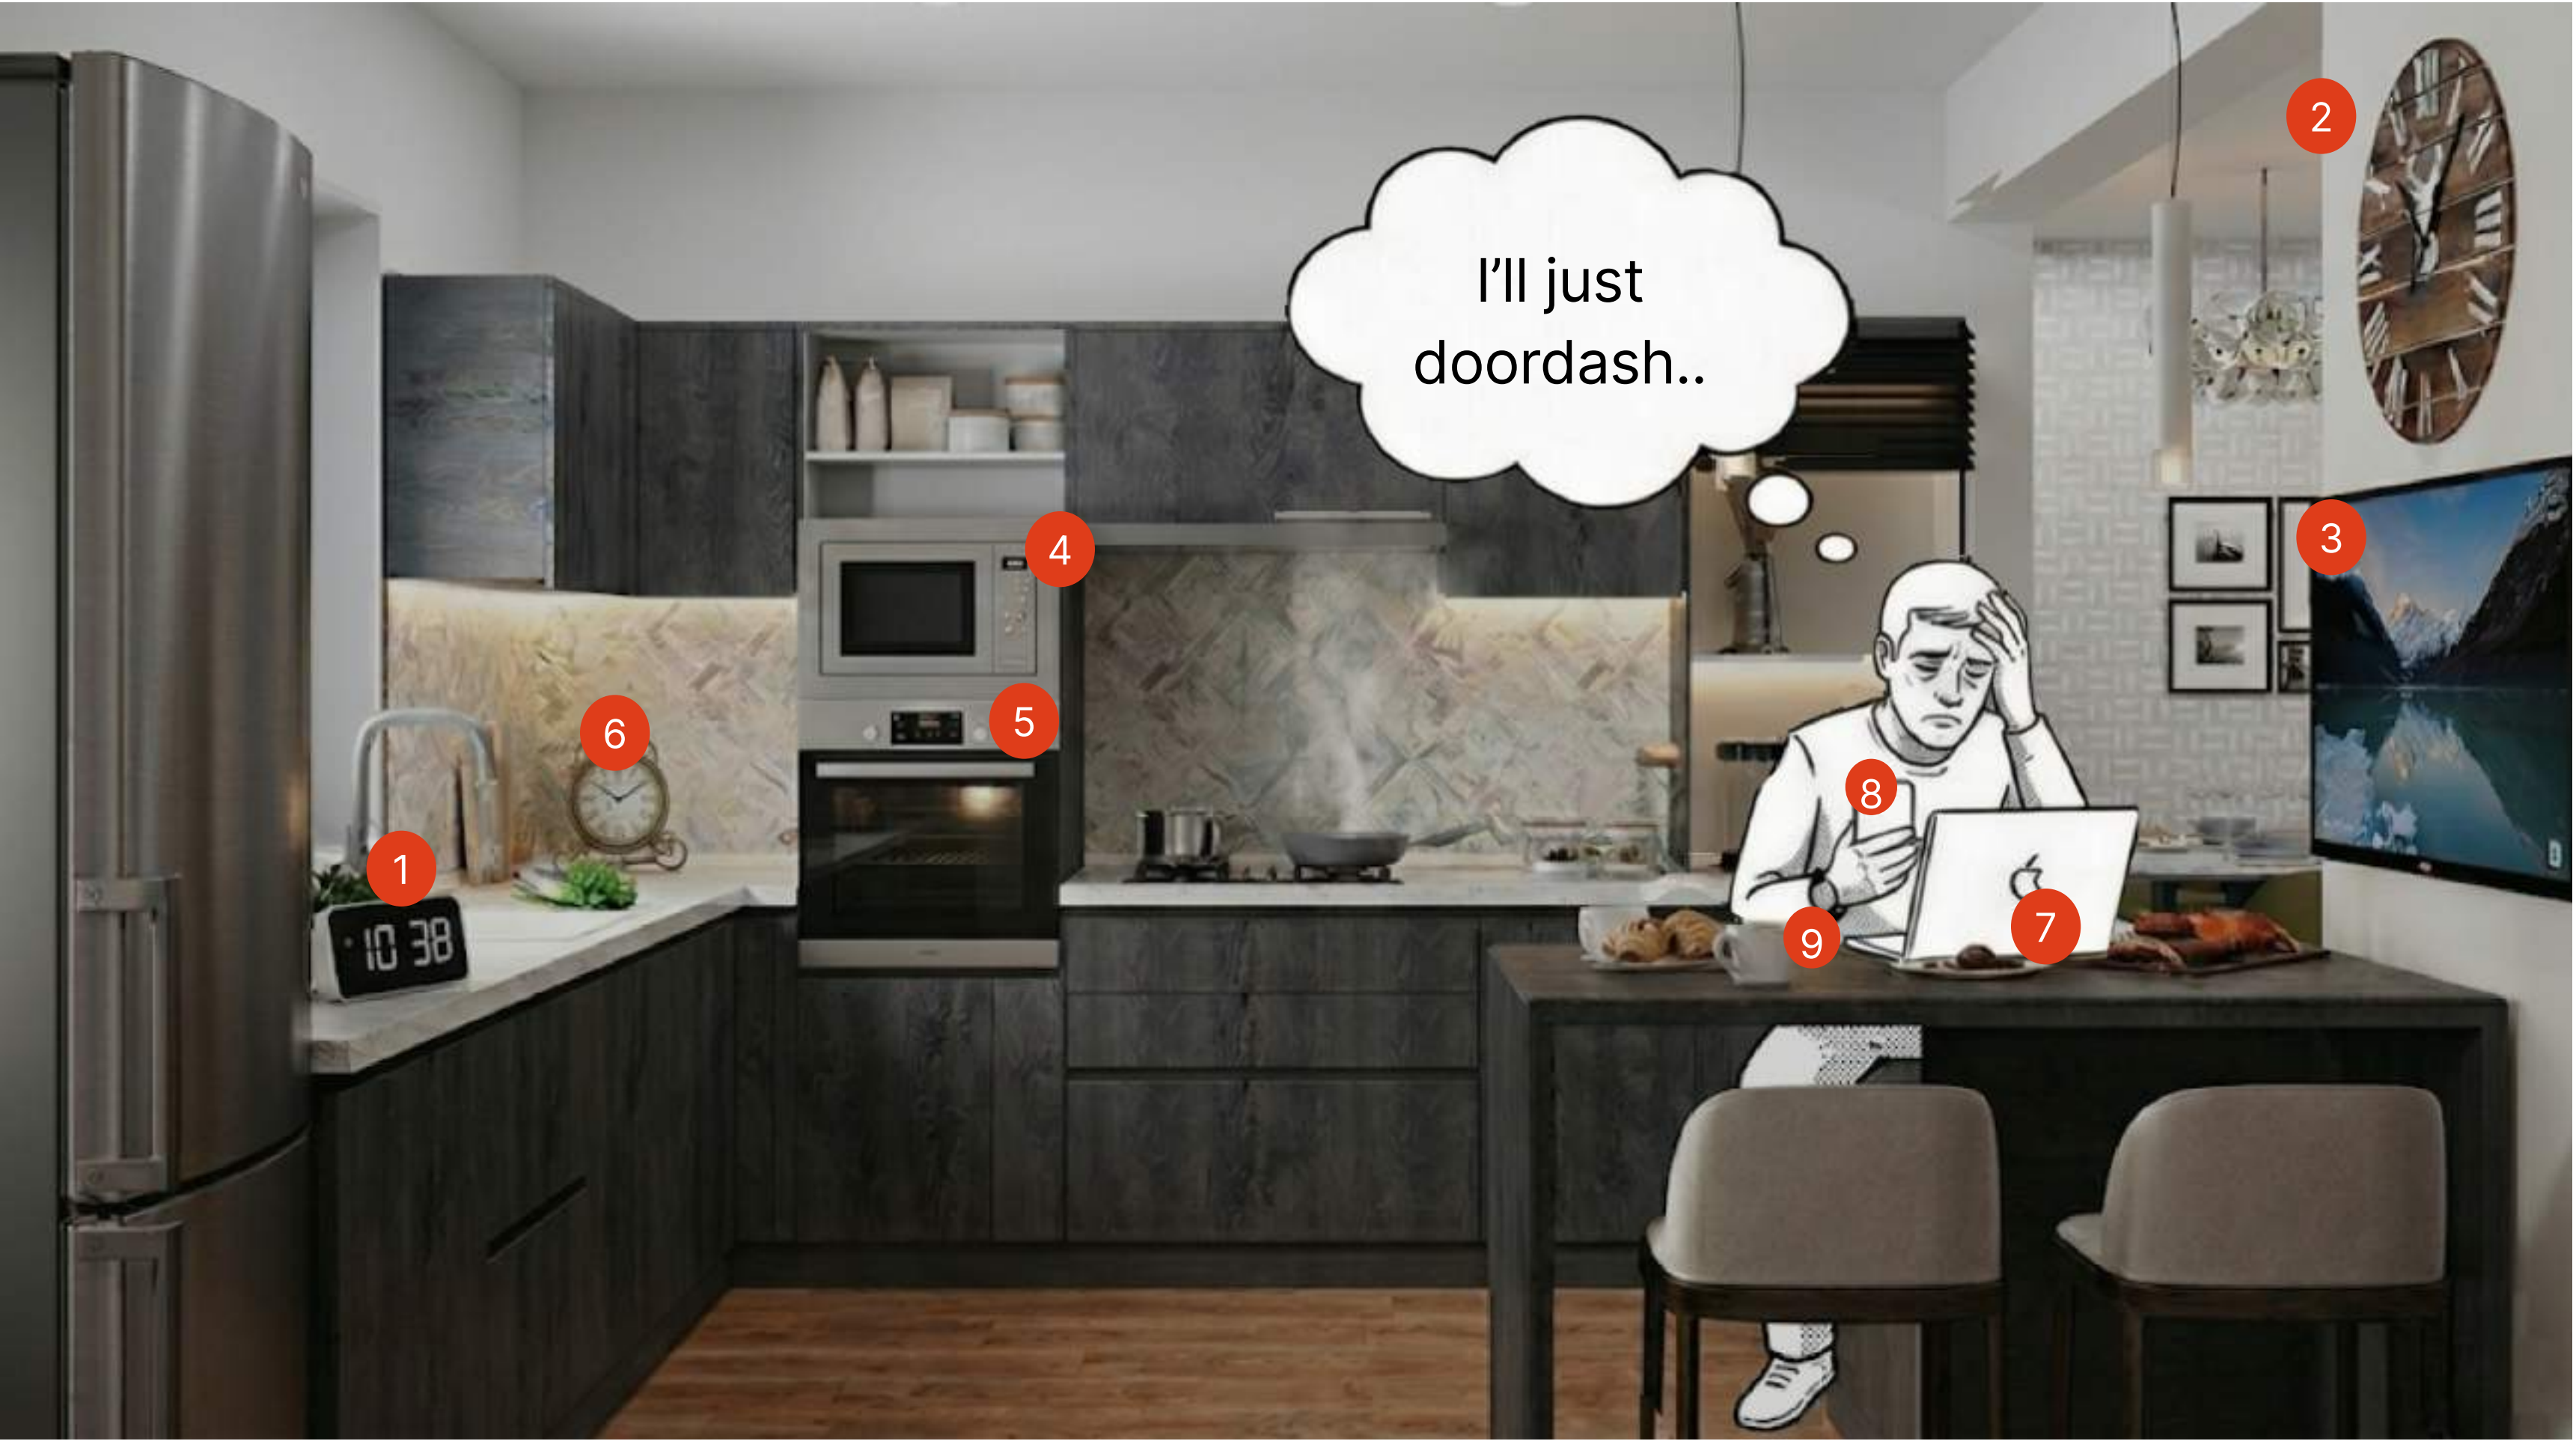

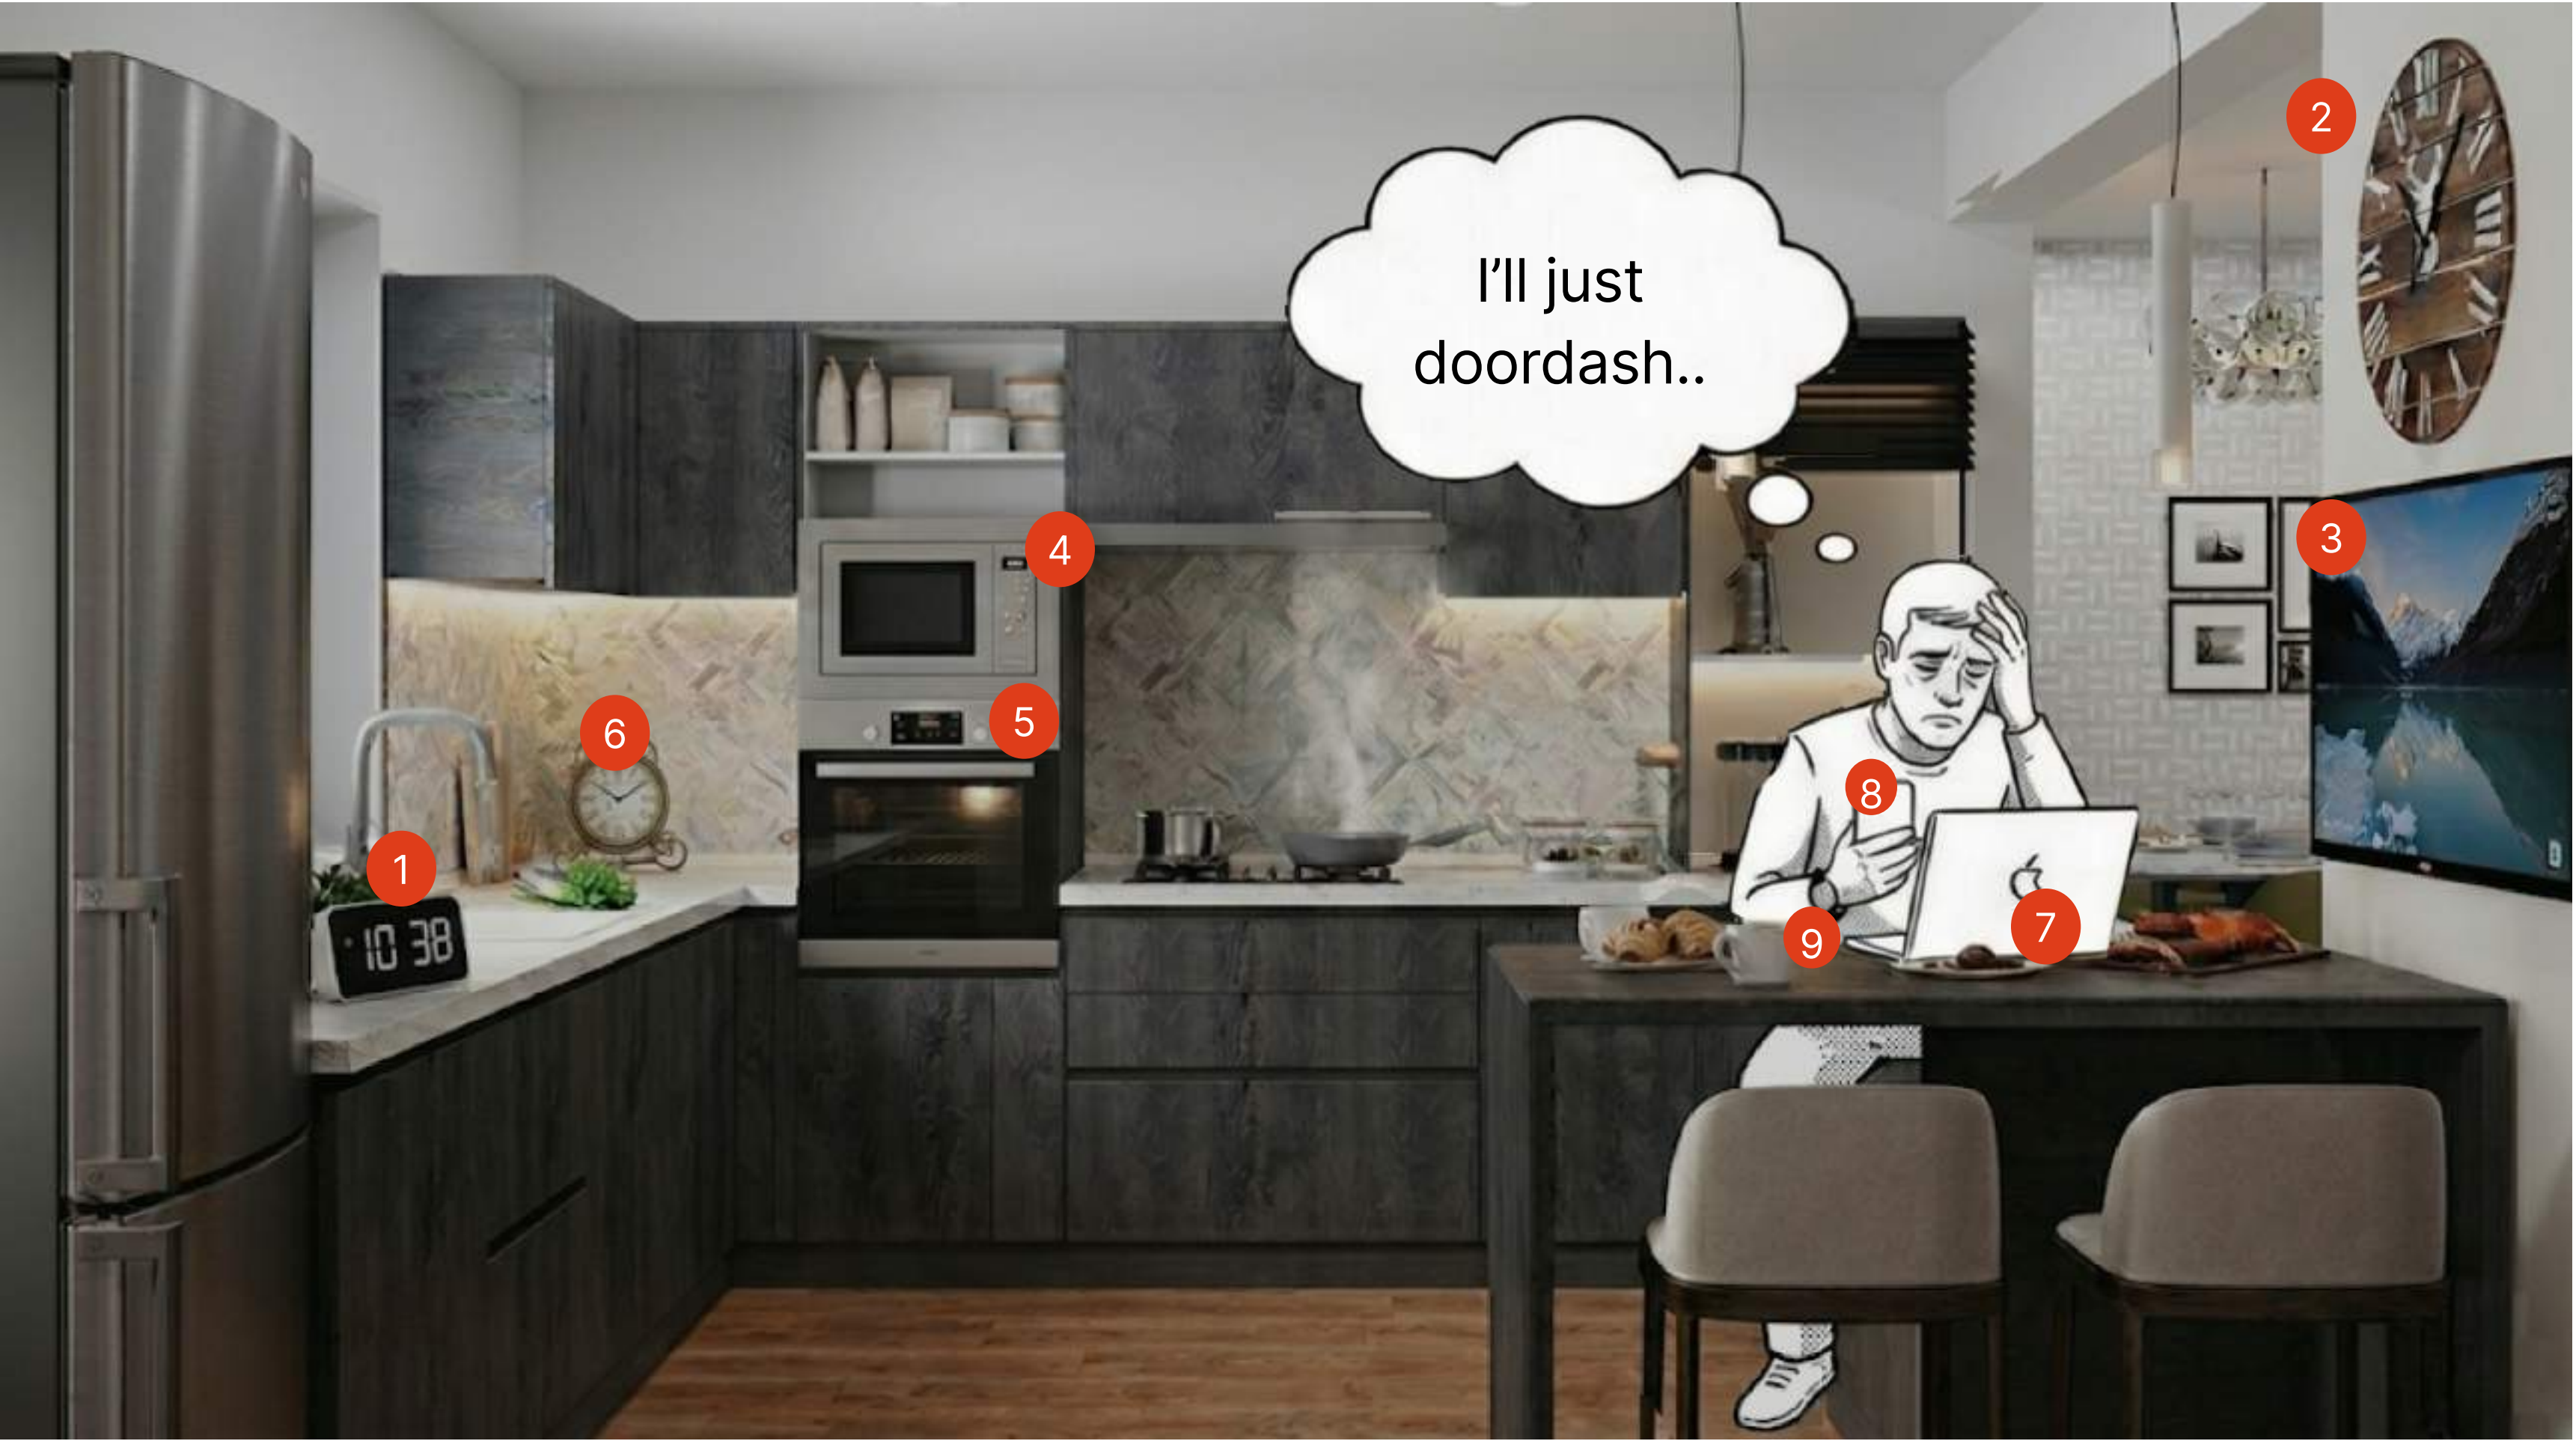

How can we fix this?

How can we fix this?

We add one more clock...

Chrono Lid

Counterintuitively, adding one more timer solves the problem.
Building the timer into the lid reduces decision fatigue.

Timer

Rotate to set. Release to start. A soft mechanical ring signals when your food is ready.

Silicone Handle

A curved silicone grip keeps the handle cool and comfortable to hold. Timer stop button is convenient on the top.

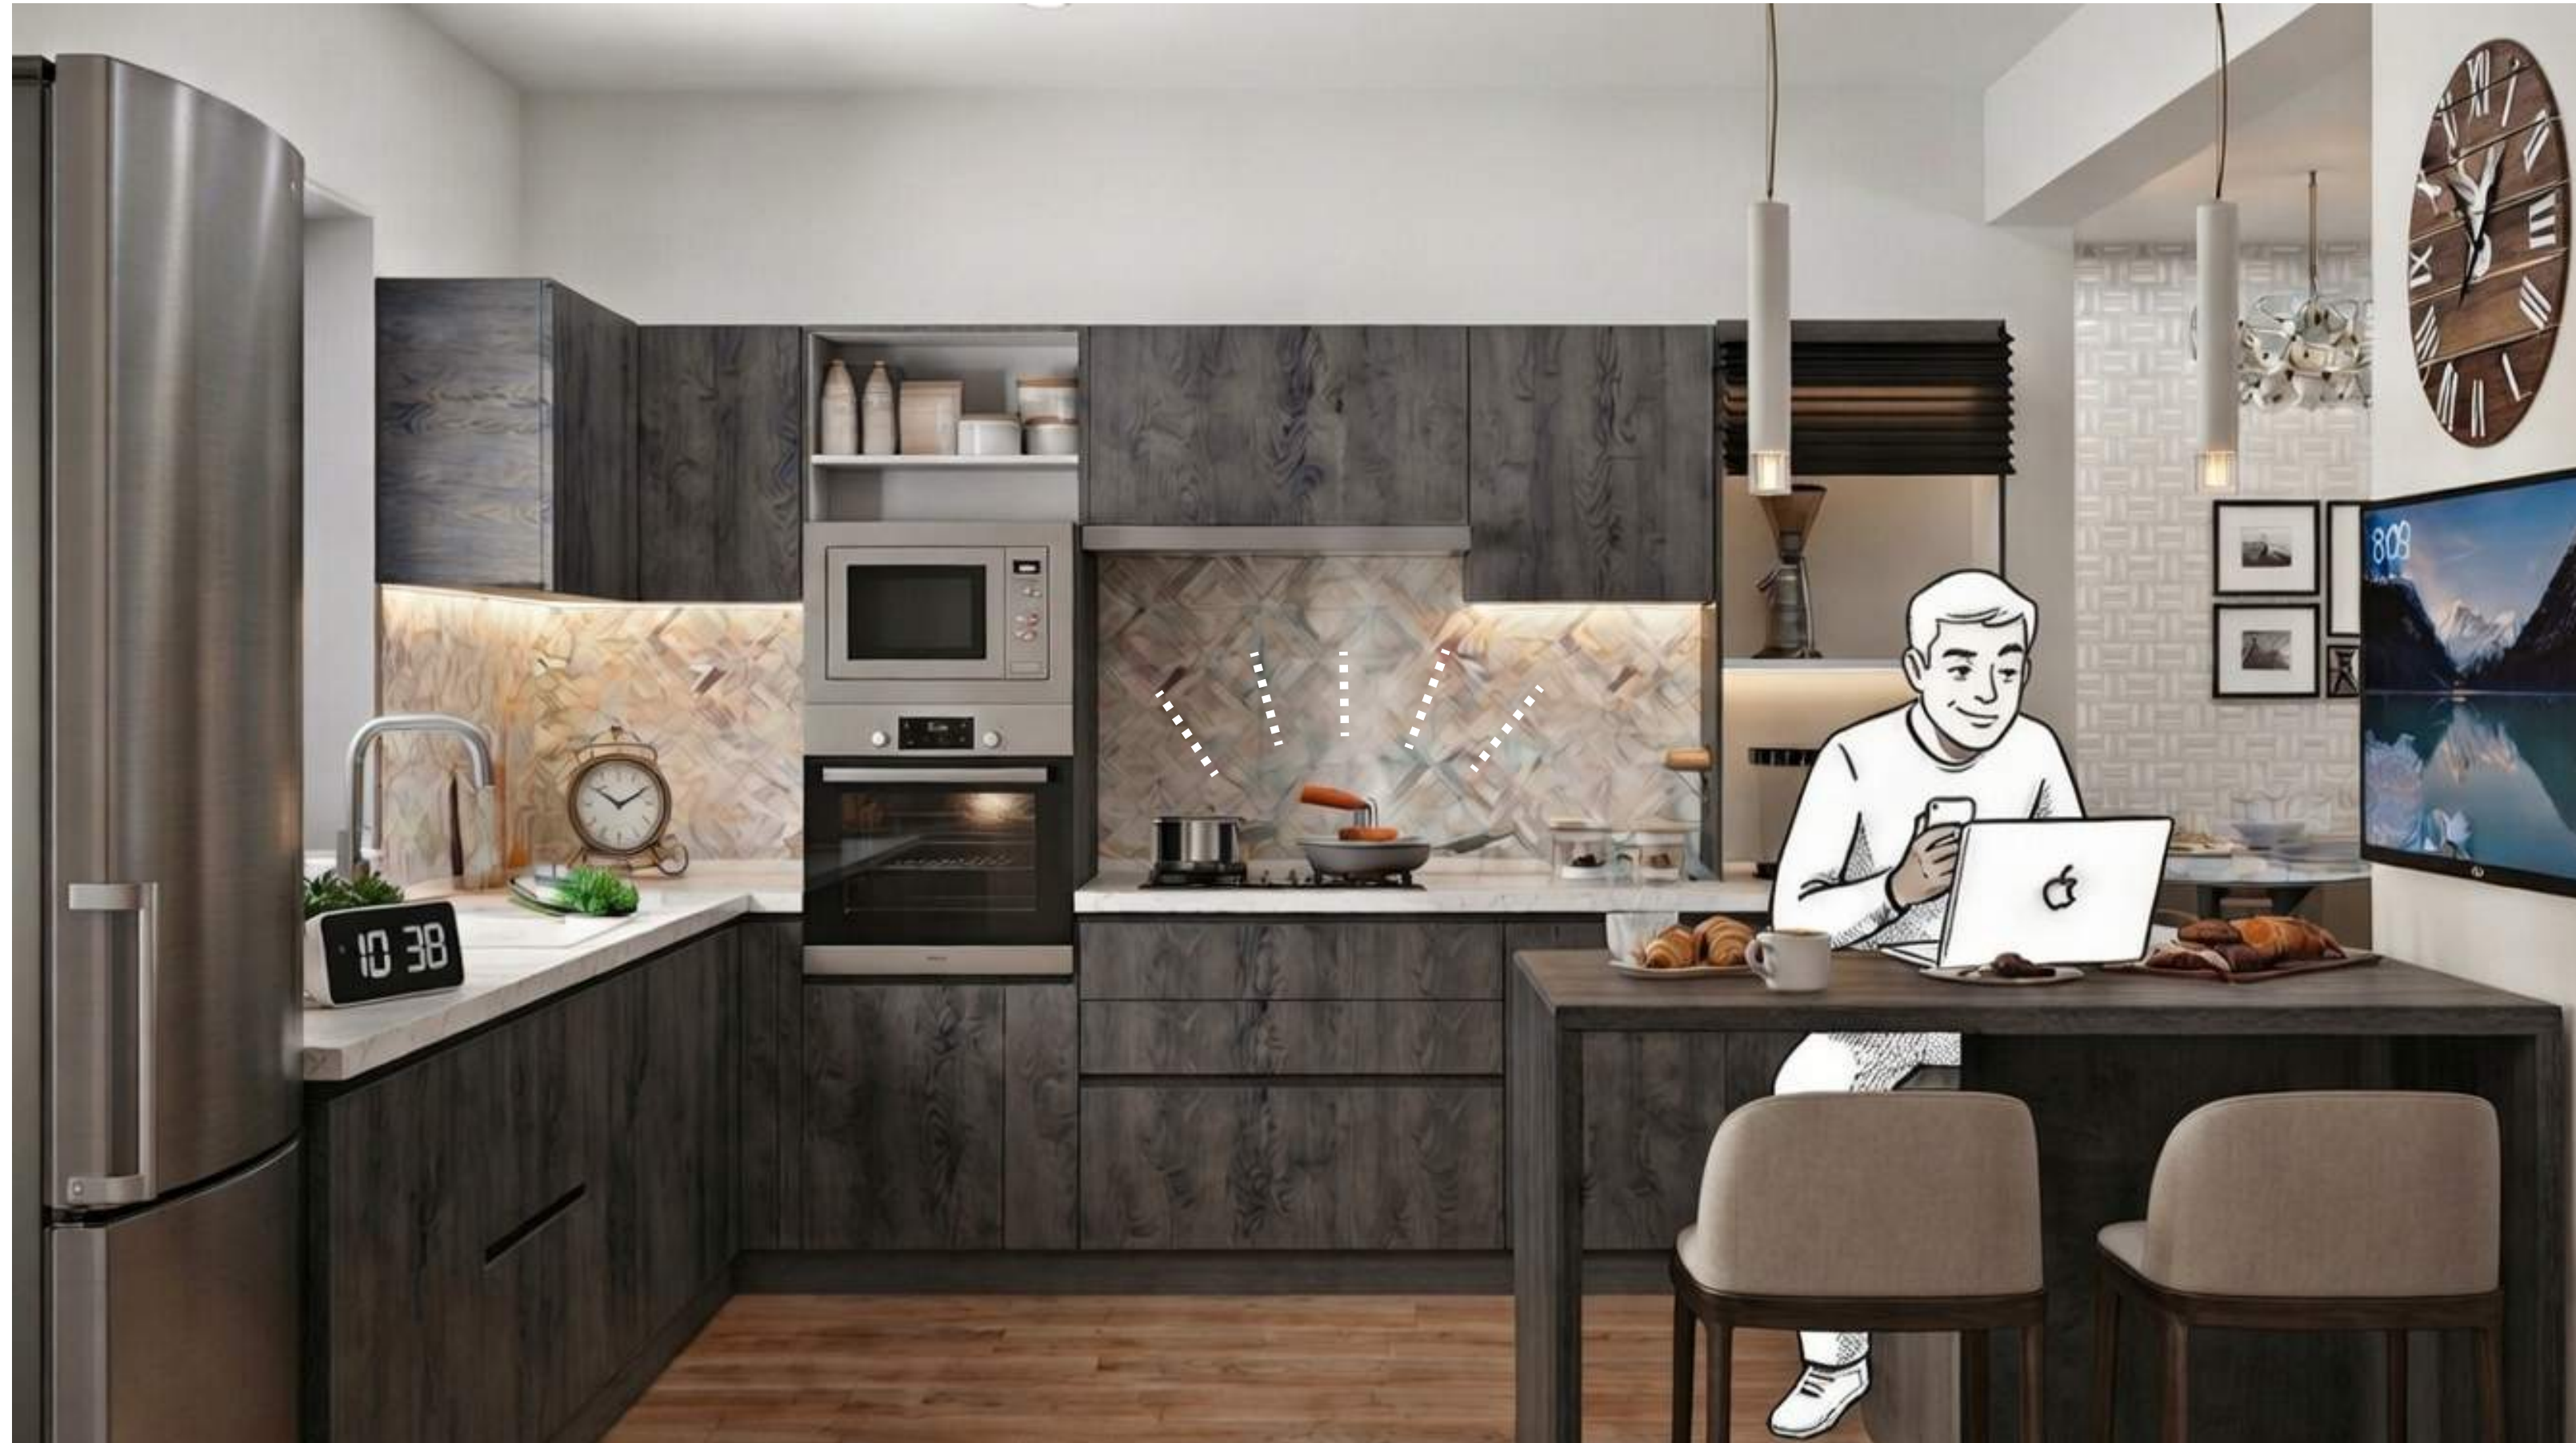

Steam Vent

A sliding plate covers or uncovers the steam vent based on what you're cooking.
